BUSINESS CONTINUITY
WE KNOW DOWNTIME IS NOT AN OPTION

BUSINESS CONTINUITY AS A SERVICE

Even a brief disruption can cause revenue loss, regulatory fines, or violations of service-level agreements. We are focused on pragmatic Business Continuity/Disaster Recovery solutions that work. OFFSITE offers a suite of services each shaped to fit the business workflows and systems that the client needs to protect.

Our **Business Continuity as a Service (BCaaS)** can be designed to include one or more of the following:

- » Custom Backup & Replication
- » Data Restoration Testing
- » Network & Application Failover Testing
- » RPO/ RTO Reviews & Testing

- » ISO, SOC & CMMC Audit Support
- » Documentation Reviews & Updates
- » Work from Home Solutions
- » Workplace Recovery Space

OUR TEAM OF NETWORK OPERATIONS CENTER (NOC) ENGINEERS IS AVAILABLE TO ASSIST YOU AT EVERY STAGE, FROM INITIAL DISASTER RECOVERY PLANNING AND DESIGN, TO SOLUTION IMPLEMENTATION, TESTING, AND TROUBLESHOOTING 24/7/365.

DISASTER RECOVERY

Disasters strike without warning. Take a proactive, not reactive, approach to ensuring your organization's critical business functions are resilient enough to remain operational, even during emergency events. Our team of process-driven engineers can assist you in getting a comprehensive business continuity plan in place, from initial design to implementation and testing.

CUSTOM BACKUP & REPLICATION

Our team of engineers work to design fully customized backup and replication policy that is optimal for your unique business needs. Once your data is backed up and securely stored, our team configures a virtual machine environment to restore your critical IT systems and applications in the event of a disaster.

WORKPLACE RECOVERY

Recent events have shown organizations that 'work from home is a viable option for many of their employees; however, for some, having a physical workplace is essential. Workplace Recovery is key to a well-rounded disaster recovery plan.
