DISASTER RECOVERY

OFFSITE PROVIDES DISASTER RECOVERY SERVICES AT OUR SECURITY OPERATIONS CENTER IN KENOSHA TO HELP PROTECT YOUR IT INFRASTRUCTURE BOTH ON-PREMISES AND IN THE CLOUD.

DISASTER RECOVERY ORCHESTRATION

Successful recoveries of entire data sets can be challenging to achieve with today's applications. Veeam's Disaster Recovery Orchestration allows you to automatically testy, document, and execute disaster recovery (DR) plans with ease.

OFFSITE provides Disaster Recovery Services at our Security Operations Center in Kenosha to help protect your IT infrastructure both on-premises and in the cloud. Whether a fully managed or co-managed solution is preferred, it is our goal to work as an integrated part of our client's IT staff.

REDUCE RISK, SAVE TIME, RESTORE CONFIDENTLY

Take recovery to the net level by automating DR processes with Veeam Backup & Replication. From mission-critical workloads with near-zero RPOs to the applications that businesses often overlook due to lacking resources, Veeam simplifies DR with:

  » One-click recovery for added resiliency
  » Automated testing of DR plans without manual intervention
  » Risk-free testing environment for DR, patches, and more
  » Full auditing and tracking of SLAs
