## YOUR PARTNER FOR COMPLETE IT SOLUTIONS

### EMPOWERING YOUR BUSINESS - HANDS-ON EXPERTISE, COAST TO COAST

At OFFSITE, we pride ourselves on being able to bridge the gap between traditional processes and cutting-edge technology. With a focus on innovation and efficiency, we provide comprehensive solutions that can help your business protect, preserve and future-proof your operations, infrastructure and sensitive data. We can help you simplify your IT through industry-leading cloud solutions, colocation, cybersecurity, and managed services that utilize the latest **AI** technologies to bolster security, improve operational efficiencies, and help safeguard your data and systems.

### WE ARE HERE FOR YOU 24/7/365

#### SECURITY & NETWORK OPERATIONS CENTER (SOC/NOC)

With OFFSITE's round-the-clock operations center, you'll have access to our team of highly-skilled network engineers, security analysts and support personnel. All employees are vetted through extensive background checks and receive security and confidentiality training.

When it comes to supporting major platforms, like Microsoft or Cisco, you can be confident in knowing that the OFFSITE team holds industry-recognized certifications. Our SOC and NOC teams work from our Tier III data center. That means we are online – **all the time** – to help you solve your most complicated IT issues.

## COMPLETE IT SOLUTIONS

In addition to delivering unparalleled technology infrastructure, as the threat landscape continues to change, OFFSITE leverages our facilities and resources to deliver a full suite of cybersecurity services that go well beyond single point solutions. Our analysts, engineers, and support personnel are among the **BEST** when it comes to monitoring and managing your critical systems. Senior Management has the experience and expertise to support your IT leadership through any demanding situations or projects that come up.

#### CLOUD

Our enterprise cloud infrastructure is built to deliver maximum performance to your mission critical workloads.

#### COLOCATION

Colocation offers the benefits of owning your own hardware while using the colocation facility's power, cooling and infrastructure.

#### CYBERSECURITY

Our cybersecurity services help technology leaders protect their assets and infrastructure from potential breaches and threats.

#### MANAGED IT

Our managed services act as an extension of your IT team to monitor, manage and maintain your hardware, software and systems.
