

SIEM MANAGEMENT

OFFSITE'S SECURITY PROFESSIONALS ANALYZE FILES WITH THE LATEST AI TOOLS TO DETERMINE IF THREAT ALERTS REQUIRE ESCALATION. WHEN THEY DO, PREDEFINED COMMUNICATIONS ARE SENT, WHILE SCOPE IDENTIFICATION AND MITIGATION STRATEGIES ARE EXECUTED TO PROTECT YOUR BUSINESS.

SIEM STANDS FOR SECURITY INFORMATION AND EVENT MANAGEMENT. IT IS A SYSTEM THAT OFFERS A HOLISTIC VIEW OF AN ORGANIZATION'S INFORMATION SECURITY. SIEM CAN PROVIDE REAL-TIME VISIBILITY ACROSS AN ORGANIZATION'S TECHNOLOGY INFRASTRUCTURE.

OFFSITE provides SIEM log management services that use AI to combine event logs with contextual information about users, assets, threats and vulnerabilities and compares them using algorithms, rules and statistics. The security analysts at OFFSITE use that data to interpret and determine whether or not a threat is real.

With a 24/7/365 Operations Center (NOC/SOC) serving the Milwaukee to Chicago corridor, our team of professional engineers offer co-managed or fully managed security operations. Contact OFFSITE's CISSP team to develop a cybersecurity program to protect your company from internal and external security threats:

- » Test & Validate Critical Security Logs
- » Categorize Log Data & Retention Requirements
- » Identify Anomalies, Vulnerabilities & Incidents
- » Aggregate Historical Log Data & Real-time Reports

With ever-increasing rate and sophistication of cyberattacks, it's no longer a matter of **"IF"**, it's a matter of **"WHEN"**. Don't wait until it's too late. Our team of certified security specialists are ready to analyze, design and deploy a cybersecurity solution to ensure your company's sensitive data is protected 24/7/365!
